THE AMERICAN MANUFACTURING COMPANY

65 Wall St.

New York

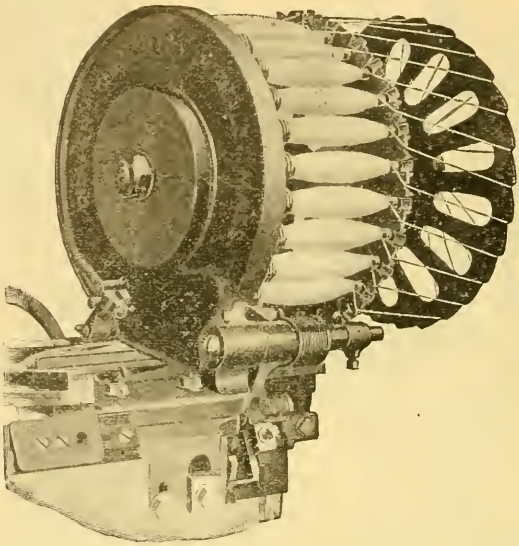
BETTER and CHEAPER THAN BELTS

We make the very best Transmission Rope and publish "A Little Blue Book on Rope Transmission" containing invaluable information to all users of Power, which we send free on application.

66133

"American" Transmission Rope.

Draper Company Products.



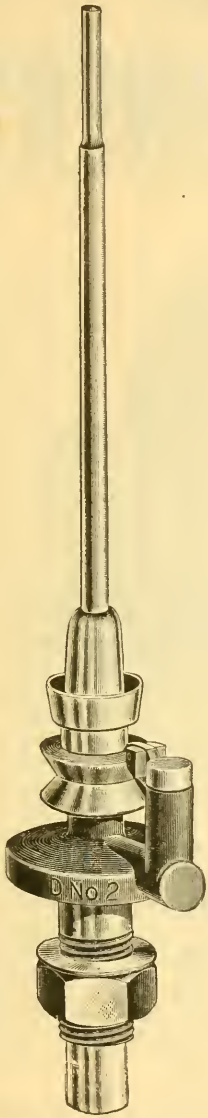
DETAIL OF HOPPER MECHANISM.

We used to claim that weavers could attend Northrop Looms in the proportion of two to one common. The users are finding this prediction far too moderate as they often run three to four times their former limit.

In several mills, weavers are paid LESS than one-half the former price for weaving cloth per cut, and yet make HIGHER wages than when running common looms.

A mill that cannot appreciate that statement simply cannot appreciate the tale told by concrete figures. Those who attempt to sell cloth handicapped by an extra cost of from one cent per pound upward, can cling to their obsolete common looms while their more enterprising neighbors glean the profits.

Draper Company Products.



Draper No. 2 Spindle.

We have by no means stopped manufacturing other Cotton Machinery simply because our loom has become such an important factor in our business. We not only continue to make and sell

Twisters,
Warpers,
Spoolers,
Reels,
Balling Machines,
Spindles,
Temples,
Separators,
Spinning Rings,
Etc., Etc.

But we continue to improve them. We have modified the detail of that most excellent spindle—**The Draper No. 2**—until after repeated tests and trials we find nothing seemingly capable of further improvement for present use.

Our rings are now made by improved process, and are better than ever.

We have recent improvements in Warpers of great importance.

We shall endeavor to keep the trade duly informed of new features by circulars.

DRAPER COMPANY,

Hopedale, Mass.

ESTIMATES FURNISHED.

Kilburn, Lincoln & Co.,

FALL RIVER, MASS.

LOOMS

For Cotton and Silk Weaving.

ALSO SHAFTING, PULLEYS AND HANGERS.

The Kilburn, Lincoln & Co. High-Speed Loom.

THERE are over 30,000 "High-Speed Looms" manufactured by Kilburn, Lincoln & Co. in successful operation in the city of Fall River alone, and many thousands more in other parts of New England and the South.

The light-running qualities of this loom and the consequent great saving in power, commend it to manufacturers. On account of the light-running feature, combined with strength, our loom is especially adapted to be run at High Speed. At the Seaconnet Mills, Fall River, 928 of these looms were in operation for a number of years at 204 picks per minute, turning out, in 301 days of 10 hours each, 14,329,219 yards 64x64 goods, a daily average of 51 3-10 yards per loom.

Of the other Fall River mills using our looms may be mentioned the King Philip, where 2,800 are in operation on the finest grades of cotton cloth. The Hargraves and Parker Mills, also, are fitted with our "New High-Speed Loom," manufacturing fancy goods, some of which are the finest produced in the country. The new Arkwright Mill is operating 1,100 of our HEAVY PATTERN Looms.

We claim that the mills producing the largest quantities of goods per day, as well as those producing the finest quality of goods, are running our looms.

We are prepared to build our High-Speed Looms with the Northrop continuous filling and warp-stop motions attached.

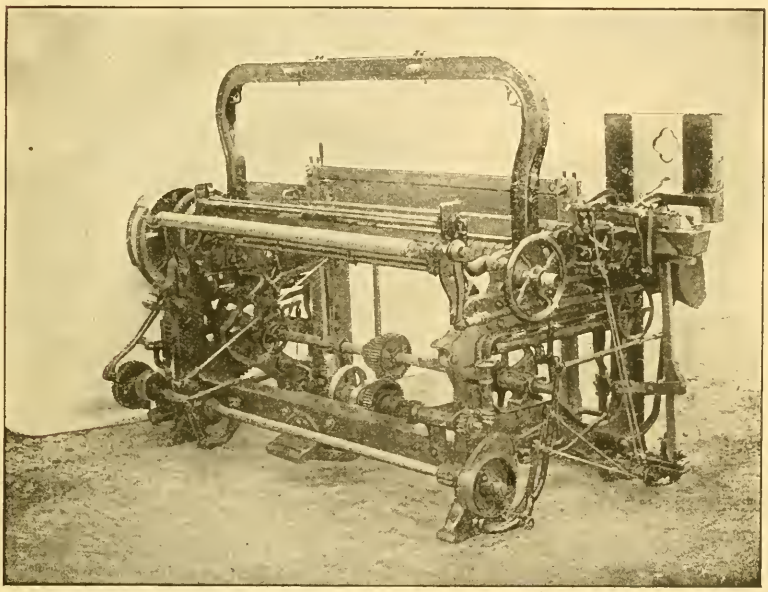
REPRESENTED IN THE SOUTH BY....

O. A. ROBBINS,

CHARLOTTE, N. C.

THE AMERICAN LOOM COMPANY,

Readville, Mass.



HARRIMAN AUTOMATIC MECHANISMS

Are now running on

The American, Butterworth & Dickinson, Colvin, Hodgson, Keighley, Kilburn & Lincoln, Knowles, Lewiston, Livesey, Lowell, Mason, Platt, Stafford and Whitin looms.

This demonstrates how easily this "Stopping Shuttle Changer" is applied to all makes of modern plain looms. It costs less to buy and to run, yet weaves more and better cloth. It runs at the present high plain loom speeds, yet changes the shuttle slowly. It is well worth a careful investigation.

Write for an "Illustrated Red Book."

JOHN HETHERINGTON & SONS, L^D.

Manchester: England,

A DIRECTORY OF

The Textile Establishments

IN THE UNITED STATES

Arranged by location, alphabetically under States, Cities and Towns, with maps showing the location of the Textile Mill Cities and Towns in the principal manufacturing States.

The following pages contain what we believe to be a complete directory of the cotton, woolen, knitting, silk, flax, and jute mills in the United States, as well as the dyeing and finishing works, bleacheries, print works, and other textile establishments.

The directory has been carefully compiled for 1901 during the past two months, by personal and mail canvass, and that our work has been thorough, manufacturers are aware by reason of mail inquiry or personal visits, and we take this opportunity to thank them for their courteous co-operation.

NEW FEATURES.

Each year some new feature has been added to this directory. This edition contains several valuable features.

The Yarn Index gives a classified Directory of Spinners and the kind of yarn they make.

The Commission Mill List gives a classified list of mills, dye houses, etc., doing work on commission.

Shoddy Mills. There is a separate list of Shoddy Mills.

Pictures of Mills. We have permitted the introduction of pictures of mills in connection with the mill report, which increases the interest and conveys a good idea of the plants.

REWARD!

To the person who shall *first* inform us of any cotton, woolen, knitting, silk, flax or jute mill, print works, dyeing (except job dyeing), bleaching or finishing establishment in the United States which was in operation in April, 1901, and which is erroneously omitted from this Directory, we will give $1.00 in cash, or credit same on subscription account, as he may prefer, subject to the following conditions:—

Full and complete information concerning the mill must be sent. By that we mean the name of the company, where located, names of the officers, including superintendent, class of goods made, capacity in machinery, that is, number of spindles, cards, looms, etc., kind of power, whether a dyehouse or not, name of buyer and selling agents.

We shall also be pleased to learn of any mills which are included in this Directory which should *not* be there owing to failure, going out of business, fire or otherwise. We reserve the right to set our own basis of compensation for this class of information.

In recognizing claims for reward, we can only consider them with reference to the circumstances in April, 1901, as it is manifestly impossible to include mills which may have started subsequent to date of publication.

We especially invite the co-operation of travelling salesmen in the correction of any errors that they may discover.

No other Directory publishers have yet dared to offer a reward for the discovery of inaccuracies.

GUILD & LORD, PUBLISHERS.

EXPLANATION OF MAPS.

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, showing the location of the textile mill cities and towns. These maps are engraved especially for the TEXTILE WORLD DIRECTORY, and are arranged with special reference to the convenience of those desiring to reach the textile establishments The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading and at top of right hand pages reference is made to the page of map for that State. The city of Philadelphia being the principal textile centre of the county, is shown by a series of six different maps, covering the manufacturing districts of that vicinity.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J.—"Passaic, D-9;" meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given, and the distance from it.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated, and railroad fares estimated on computation of about 2½ cents per mile in the Eastern States, and 3 to 4 cents in Southern and Central States, for local travel.

The classification of the following section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

Under each city or town are grouped *all* the textile mills in that place without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

EXPLANATION OF ABBREVIATIONS.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

C means cotton mill.
J means jute mill.
Bl means bleachery.
W means woolen mill.
K means knitting mill.
F means finishing works.
Fl means flax mill.
S means silk mill.
D means dyeing establishment.
Pr means print works.

These abbreviations are placed at right of column, so as to avoid confusion.

POWER. The kind of power is designated—steam or water.

DYE. If the mill has dyeing facilities, the word "dye" is used.

S. AGTS. means selling agents. The other abbreviations will be easily understood.

BUYER. In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.

LATE ADDITIONS AND CORRECTIONS.

received too late for classification will be found by reference to the Table of Contents.

ALABAMA.

See map on page 68.

For explanations of abbreviations see page 66.

Alabama City. D-8. 2 1-2 miles from Gadsden.

PHILADELPHIA AND SUBURBS.

See maps on pages 200, 202, 204, 206, 208, 210.

Pennsylvania, outside of Philadelphia and Suburbs, is classified separately and follows Philadelphia.

Under the general head of Philadelphia are included all textile establishments, not only in the city proper, but in the local districts of Manayunk, Frankford, Kensington, Germantown, Bridesburg, West Philadelphia, Port Richmond, and Nicetown.

These establishments are arranged in alphabetical order, regardless of location or kinds of goods made. The street address is given and the district mentioned. When possible, the approximate location of each mill is determined by designating the map and square in which it is located.

Map A is a "skeleton map" showing the general location of the different mill districts, some of the principal streets and avenues, and railroads. It gives a general idea of the city, without attempting to show the streets. This map is the basis of the enlarged sectional maps which follow. Certain squares, embracing the most populous mill districts, have been enlarged in maps B, C, D, E, and F. These maps do not cover the whole city, but they do cover the majority of the mills. There are, however, quite a number of mills outside the sections embraced in the maps, and these mills have no map and square number.

Map B shows the principal down town business section.

Map C shows the Kensington and Richmond districts.

Map D shows a large part of Germantown.

Map E shows Frankford and vicinity.

Map F shows Manayunk, Fall of Schuylkill, etc.

The Abbreviations used are the same as in other parts of the directory.

The Directory of Philadelphia and suburbs has been compiled especially for the TEXTILE WORLD, by thorough personal canvass. The Publishers will esteem it a favor to be informed of any inaccuracies that may be discovered, or of any changes that may occur after publication.

WHERE? HOW? WHY? WHO?

Where can we get such a machine?

How can we produce that effect, or color, or fabric?

Why does this machine run badly, and what can I do to fix it?

Who makes such and such fabrics?

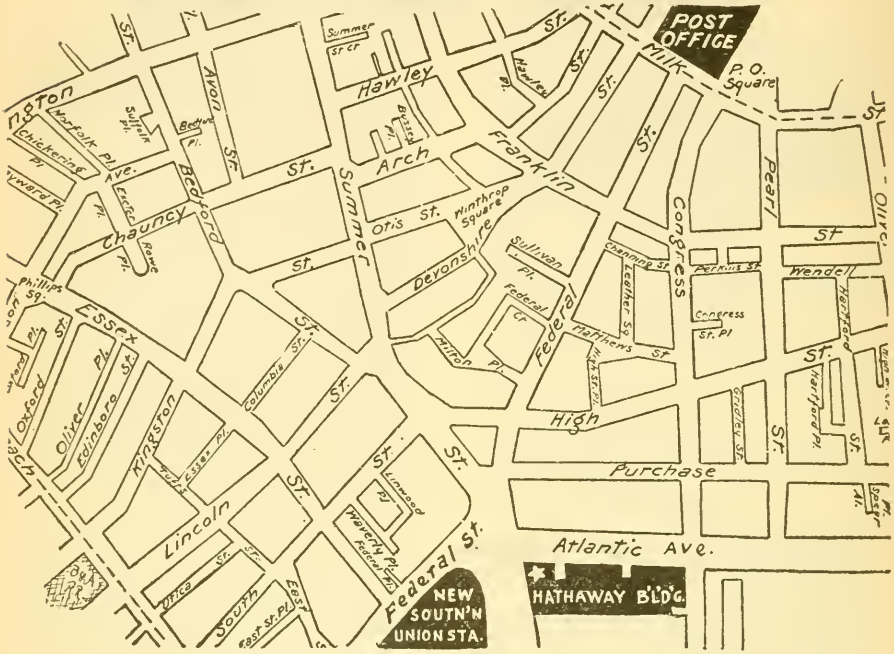
HATHAWAY BUILDING,

620 ATLANTIC AVENUE. BOSTON.

The Heart of the Wool Trade. The Centre of the Wool Trade in Boston, the Leading Wool Market of the Country.



The Wool, Wholesale Dry Goods and Machinery Districts of Boston.

From the accompanying map, which shows the wool, dry goods and machinery districts in the city of Boston, the central location of the **Hathaway Building** will be noted. It is directly across the street from the new **Southern Union Station,** 5 minutes walk from the Postoffice, along Federal St., 5 minutes walk from Washington St. via. Summer, 15 minutes walk from the North Union Station. Electric cars to all parts of city and suburbs pass the door, and a station of the new elevated road will be opposite.

Centering about Chauncy and Franklin Sts., is the wholesale dry goods districts, within 5 minutes walk, while on Atlantic Ave., Federal, Purchase, High, Summer and Congress Sts., **the leading wool market of the country** is located. The cotton brokers centre about Postoffice Square, Kilby and State St., 7 minutes walk. The machinery and dyestuff dealers are mostly to be found along Pearl, Congress and Oliver Sts. within 5 minutes walk, thus the claim can justly be make that **the HATHAWAY BUILDING is the textile centre.**

The building itself is the business home for a large number of concerns in the textile line, a partial list of whom we give below.

Anthony & Kenyon,	Wool.
Berryman, R.,	"

WALPOLE, - MASS.

ALPHABETICAL INDEX

—TO—

The Textile Establishments

OF THE UNITED STATES.

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters; thus,

(C) means a cotton mill (K) means a knitting mill (Bl) means a bleachery
(W) means a woolen mill (Fl) means a flax mill (F) means finishing establishment
(S) means a silk mill (D) means a dye works (J) means a jute mill

The *number* which follows indicates the *page* upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names; viz., proprietor's and company's name and also the name of the mill, as, for example, E. V. Pike; Sunnyside Mills, Cheltenham, Pa. In the alphabetical index this is listed as follows: Pike, E. V., Cheltenham, Pa., also under the head of Sunnyside Mills (E. V. Pike), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which *have addresses*.

As the body of the Directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can readily be found through one or the other system of classification, viz., by its name in the alphabetical index or by its location in the body of the book, where full particulars about each mill will be found.

Abbeville Cotton Mill, Abbeville, S. C. (C) 256.
Abbott, Amos & Co., Dexter, Me. (W) 101.
Abbott Worsted Co., Graniteville, Mass. (W) 119.

Single and Twisted, Carded—Combed—Bleached

Fine Yarns,
For Electrical Purposes.

FROM

American Peelers, Sea Island, Peruvian and Egyptian Cotton.

BENNETT, HOWLAND, ROTCH, N. B. SPINNING, COHANNET, NEMASKET, GLOBE, SANFORD. } **650,000 Spindles.**

Entire product sold direct to consumers through the Company's own offices.

The Yarn Trade Index.

In this department will be found classified lists of manufacturers of different kinds of yarn who sell their product. So far as possible the sizes of yarn which are made are given and the form in which the yarn is put up, together with the selling agents of the mills. Dealers and commission merchants are not included in these lists. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers shall be pleased to receive a notice of any corrections that should be made.

Owing to lack of space, all mills are not included under every heading under which they should appear. So far as possible they have been listed under the heading which is their principal line of business, or for which they have expressed a preference.

If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from which they may be obtained.

COTTON KNITTING YARNS.

Carded Mule Spun American Peeler and Egyptian.

Adamson Mill Co., Cedartown, Ga. 6s to 22s; cops, cones.

Alden Knitting Mills, New Orleans, La. 12s to 20s; cones, tubes, cops. Sell direct.

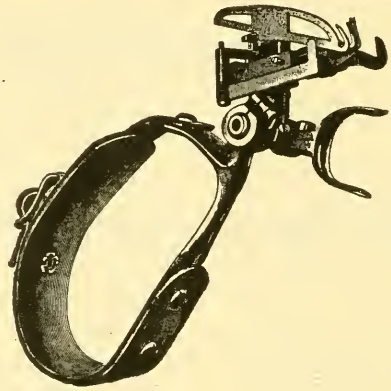
The Greatest Evil in a Cotton Mill!

IF a cotton manufacturer were asked to name the one evil causing more annoyance and bad work than any other one thing in a cotton mill, he would probably say

"SPOOLER KNOTS."

This is the Remedy



The Barber Knotter

Hundreds in Use.
Improves the Spooling.
Decreases the Cost.

BARBER & COLMAN,

11 Pemberton Square, Room 1119,

Table of Breaking Strength of American Cotton Warp Yarns.

[By permission of the Draper Co.]

In making these tests a skein of 120 yards, or 80 turns of a 1 1-2 yard reel is used. The breaking point is given in pounds and fractions.

Number.	Breaking Weight.	Number.	Breaking Weight.	Number.	Breaking Weight.	Number.	Breaking Weight.

THE "SIMPLEX" TABLES.

Everyone connected with the management of mills knows of the great amount of time consumed in frequent calculations. The same problems are frequently coming up for solution, requiring much valuable time in repeating the same calculations.

We have compiled these "Simplex" tables to save much of this labor, and give mill workers a quick and ready method of solving many of the problems constantly arising in mill work.

They have been carefully compiled, and have a range which will cover most woolen and worsted fabrics. We believe them to be an improvement over any yet published, and commend them to the trade believing they will prove to be labor savers.

COMPARATIVE YARN TABLES.

Cotton, woolen, worsted and linen each have their peculiar system for numbering yarn based on a given number of yards per pound. These different systems are a cause of confusion, especially in mills using yarn of two or more systems of numbering. This table has the different standards used in the United States, so arranged that the equivalent of the sizes by the different standards may be found on the same line, and readily compared.

The knitting mills usually employ the weight in grains of $6\frac{1}{4}$, $12\frac{1}{2}$, 25 or 50 yards as their standards, and these systems have been included.

The Basis of the Different Systems is as follows:

1 Run woolen (U. S.) equals 1600 yards per lb. of 16 oz. (7000 grains).

1 Cut woolen (U. S.) equals 300 yards per lb. of 16 oz. (7000 grains).

No. 1 worsted (Bradford count) equals 560 yards per lb. of 16 oz. (7000 grains).

No. 1 worsted (International count) equals 1000 metres per kilogramme.

No. 1 Cotton equals 840 yards per lb. of 16 oz. (7000 grains).

No. 1 Spun Silk equals 840 yards per lb. of 16 oz. (7000 grains).

No. 1 Linen equals 300 yards per lb. of 16 oz. (7000 grains).

A knot (woolen)	is 80	yards	single	yarn.
A knot or lea (worsted)	is 80	"	"	"
A hank (worsted)	is 560	"	"	"
A skein or lea (cotton)	is 120	"	"	"
A hank (cotton)	is 840	"	"	"
A lea (linen)	is 300	"	"	"

The figures in these columns are carried as far as they have practical value.

THE "SIMPLEX" REED TABLES.

EXPLANATION.

The heavy figures at left of table are the number of threads in the warp; the threads per inch are at the top of each column. (For explanation of threads per inch see special table at end of Reed Tables.)

The width of a warp in the loom can be found opposite the number of threads in the warp and under the number of threads per inch in the reed.

Example: 2200 ends in the warp, No. 7 reed, 4 ends per dent. Opposite 2200 in the left hand column of table and under the column having 28 at the top, we find 78½, the width in inches in the loom.

The arrangement of this table makes it very convenient in laying out new fabrics and altering old ones, as the different widths, resulting from reeding a given number of ends with different numbers of threads per inch, are found on one line; and the different widths resulting from any change in the number of threads in the warp, are to be found in one column.

WOOL WASHING, PREPARING and DRYING

MACHINERY.

We are the only Builders of a

Parallel Motion Rake Wool Washer.

This is a machine in which the teeth enter and withdraw from the liquor in a perpendicular line, and travel ahead horizontally. By this rectilinear motion the finest wools can be handled without any roping or stringing. We also build

Wool Dryers, Cotton Dryers, Burr Pickers, Automatic Feeds, Wool and Waste Dusters, Rag Dusters, Exhaust Fans, Burr Machines for Cards Etc.

C. G. SARGENT'S SONS, *Graniteville, Mass.*

ENDS PER INCH AND THREADS IN DENT.

The following table shows the number of threads per inch obtained by the use of different reeds and different numbers of threads in a dent. In the first column will be found the number of threads per inch, and opposite are the various combinations. For instance, 32 threads per inch can be obtained by using a 16 reed, with two threads per dent, or an 8 reed, with four threads per dent.

Explanation of the Tables

(On following pages)

For Finding the WEIGHT OF YARN per Yard of Cloth.

These tables show the weight of different lengths of yarn of various sizes, and will save many long calculations of the weight of different fabrics per yard.

At top of each column is given the size of yarn by cut, worsted hank or woolen run system.

In left-hand column is the length of yarn, and the figures in small type indicate weight of these various lengths in the different sizes of yarn. Suppose the fabric has 3600 yards of 2/30 worsted warp per yard of cloth, and 3500 yards 2/32 worsted filling per yard of cloth. Opposite 3600 in left-hand column, and under No. 15 worsted (2/30) at top of table, we find $6\frac{9}{10}$ ozs. as the weight of warp per yard. Opposite 3500 and under No. 16 worsted (2/32) we find $6\frac{2}{10}$ ozs. as weight of filling per yard, and the two weights combined give $13\frac{1}{10}$ as loom weight of goods.

Rule to find Number of Yards of Yarn per Woven Yard of Cloth:

For warp add to the number of threads on the warp an allowance for take up in weaving. This allowance varies from 5 per cent. to 10 per cent. in regular woolen and worsted fabrics.

For filling multiply width in loom in inches by number of picks per inch and add 5 per cent. to this product.

Example: Fabric has 3000 ends in warp, 70 inches wide in loom. Woven with 50 picks.

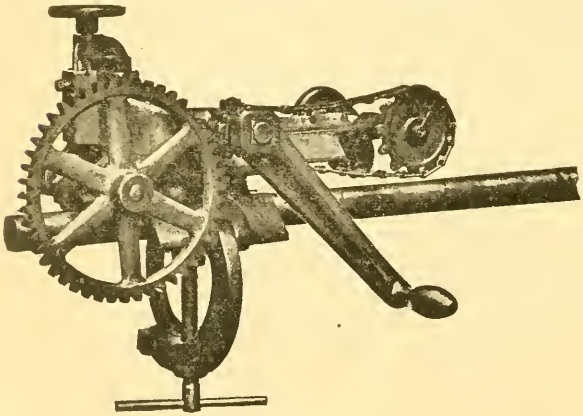
$3000 + 10\% = 3300$ yards warp yarn per yard of cloth.

$70 \times 50 = 3500 + 5\% = 3675$ yards filling yarn per yard of cloth.

LOOM REEDS OF EVERY DESCRIPTION.

LEICE REEDS,
GUIDE REEDS,
SLASHER COMBS,
HEDDLE RODS, ETC., ETC.

NOTE:—Our Portable Key Seater will enable you to cut your Key Seats on any size shafting during the noon hour, and without removing the shafting from the hangers.



Patented, July 23, 1895.

KNITTING MACHINE GAUGE.

FLAT MACHINES.

In measuring flat machines, the measurement should be taken from centre to centre of the outside needles; count the needles and divide by the number of inches, thus giving the number of needles to the inch. In this method, however, it would be wrong to count both outside needles, as the extreme at one end would be the beginning of another measurement. The most practical way of counting would be to place your rule against the inside of one needle and count the other extreme in the measurement, thus making the number of needles and the number of spaces even, and obtaining the correct number within the measurement.

CIRCULAR MACHINES.

In measuring circular machines of any kind, always measure from the points at which the stitches are formed; thus, in obtaining the diameter of a circular machine of any kind with upright needles, measure from back to back of the needles, as that is where the work hangs and where the stitch is formed. In getting the diameter of Loopers or Seaming machines, measure from outside to outside of the brass through which the points project, this being the point of suspension of the work. To find the circumference from the diameter: multiply the diameter by 3 1/7 or 3.14, thus reducing the circle to a straight line. To illustrate: Suppose the diameter of a machine is 10 inches, multiply 10 by 3.14 giving 31.4. Suppose there are 314 needles in the machine, divide 314 (the number of needles) by 31.4 (the number of inches in the needle line or circumference of the machine) and find that there are 10 needles to the inch.

Following is a small table of diameters and circumferences.

Dia.	Cir.	Dia.	Cir.	Dia.	Cir.
1	3.1416	9	28.274	17	53.407
2	6.2823	10	31.416	18	56.549
3	9.4248	11	34.558	19	59.69
4	12.566	12	37.699	20	62.832
5	15.708	13	40.841	21	65.973
6	18.850	14	43.982	22	69.115
7	21.991	15	47.124	23	72.257
8	25.133	16	50.265	24	75.398

RULE.—Divide the number of needles by the circumference or length in inches to find the gauge. Multiply the number of needles per inch as gauge by the number of inches in needle line to find the number of needles in head, cylinder or machine.

HOSIERY NEEDLE WIRE.

Needle wire varies some in the standard sizes by best makers, but the following are the nearest sizes in Stubbs' gauge and micrometer.

Stubbs' Gauge.	Fraction of an Inch.	Stubbs' Gauge.	Fraction of an Inch.	Stubbs' Gauge.	Fraction of an Inch.
23½	.0245	21½	.030−	19½	.039−
23	.026−	21	.0315	19	.0415
22½	.0275+	20½	.033+	18½	.044+
22	.029−	20	.0355	18	.0475

These figures and the following ones on spring needles are given from actual measurements by one of the standard needle makers of this country.

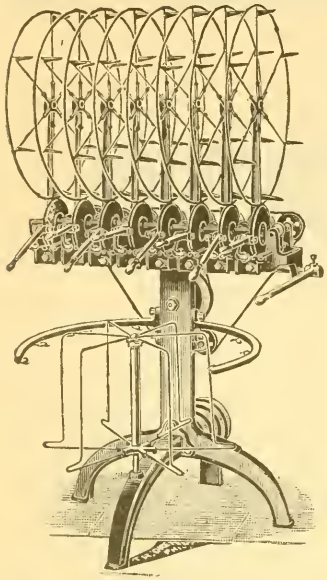
JAMES TAYLOR,

Knitting Machinery for Hosiery and Underwear



Back-winding Machine for winding the yarn from imperfect pieces back into skeins.

New and Second Hand.

SPECIALTIES IN NEW.

Sole Selling Agent for Stafford & Holt.

UNEXCELLED MACHINERY FOR RIBBED UNDERWEAR,

Sweaters, Bathing Suits, Toques and Specialties, with or without Automatic Stripers and Designers.

These machines have the **only absolutely perfect Take-up Device** Depends neither on springs, friction, ratchet, nor state of weather for its efficiency.

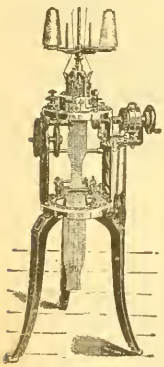
Builder of the **ONLY BACK-WINDING MACHINE** in the market. Ravels and backwinds all classes of Knit-Goods, including plated work and fabric made on 8-feed plain or tuck machines.

All inquiries and orders relating to the above machines should be addressed direct to me.

LARGE STOCK IN SECOND HAND.

Everything pertaining to the manufacture of all classes of Knit Goods, for example: Machines for Ribbed and Flat Underwear Hosiery, Sweaters, Jackets, Mittens, Gloves, Borders, Facing, and Gas Mantles, Button-hole and Button sewing Machines, Concealed Stitch Welters and Trimmers, Union Specials, Steam Presses, Winders, Ribbers, Sleevers, Loopers, Whizzers, Stop-motions, Cylinders and Dials, Needles, Pins in bulk, Brass Stamps, Stamping Ink, —in short, write us if you are in need of anything, or if you have any Machines for sale.

835 ARCH STREET, PHILADELPHIA, U. S. A.



McMICHAEL & WILDMAN MFG. CO.,

RIB KNITTING MACHINERY.

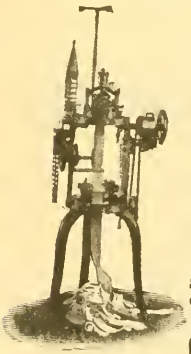
AUTOMATIC AND PLAIN.

For all classes of Ribbed Hosiery and Underwear, Combination Suits, Sweaters, etc.

ESTABLISHED REPUTATION FOR Largest Production, Best Quality Fabric, Durability, Economy of Operation.

The cut shows our Automatic Sleever and Fancy Hosiery Machine, with Chainless Measuring Attachment. Full particulars, Description and Samples furnished upon application.

NORRISTOWN, PENN.



GERMANTOWN HOSIERY MACHINE WORKS

Cardigan Jacket and Circular Knitting Machines for Shirts and Hosiery.

Cylinder and Dials

Of all kinds made and hardened.

Germantown Skein Winder and Links For Double Ribs.

Special Machine and Jobbing Work Promptly Attended to. Also equipped to do general repairing of Platt's Cotton Spinning Machinery. Correspondence solicited.

GEORGE W. LINDLEY, Prop., 5122 Wakefield St., Germantown, Pa.

SPRING NEEDLE MACHINE GAUGE.

In Cylinder Knitting Machines as made in Cohoes and Troy, the needles are cast in metal, two in a block, and the gauge is known by the number of blocks or leads in three inches.

To reduce the gauge to inches multiply by $\frac{2}{3}$, for the gauge is number of leads in three inches and there are two needles to a lead. This is exact for a flat leaded frame, but on a circular machine the gauge is made a trifle coarser owing to the curvature of the needle line, and moreover, coarser still by the custom some firms have of gauging on the needle and the lead (i. e. from the lead at one end of the three inches, to the needle at the other end), or by gauging on the needles entirely.

The regular sizes, however, are about as follows:—

30	gauge,	20	needles	to inch	24 / $23\frac{1}{2}$	Stubbs'	gauge	wire	.023 to .0245
24	"	16	"	"	23 / $22\frac{1}{2}$	"	"	"	.0255 to .0275
22	"	$14\frac{2}{3}$	"	"	22	"	"	"	.029—
20	"	$13\frac{1}{3}$	"	"	21	"	"	"	.0315
18	"	12	"	"	20	"	"	"	.0355
16	"	$10\frac{2}{3}$	"	"	$19\frac{1}{2}$	"	"	"	.039—
14	"	$9\frac{1}{3}$	"	"	19	"	"	"	.0415

In Philadelphia district the number of needles per inch is most used as the standard on spring needle machines, rather than the gauge.

HOSIERY FRAME GAUGE.

In knitting frames for full-fashioned underwear the gauge is known by the same rule as on cylinder shirt frames.

Thus, 24 gauge is 16 needles to the inch.

The needles, however, are made from heavier wire for same gauge, thus:—

36	gauge,	24	needles	to inch	24 or $23\frac{1}{2}$	Stubbs'	gauge	wire	.023 .0245
30	"	20	"	"	22	"	"	"	.029—
27	"	18	"	"	21	"	"	"	.0315
24	"	16	"	"	20	"	"	"	.0355
21	"	14	"	"	$19\frac{1}{2}$	"	"	"	.039
18	"	12	"	"	19	"	"	"	.0415

In warp knitting frames, the gauge is known by the number of needles to the inch.

LOOPERS FOR HOSE AND HALF HOSE.

The following loopers should be used for looping hose and half hose made on Seamless Knitting Machines with the following number of needles, and ranging in size from $2\frac{1}{2}$ to 4 inches.

60	to	72	needles	on	7-point	looper.	
72	"	84	"	"	9	"	"
84	"	96	"	"	10	"	"
96	"	108	"	"	12	"	"
108	"	120	"	"	13	"	"
120	"	132	"	"	14	"	"
132	"	144	"	"	15	"	"
144	"	160	"	"	16	"	"
160	"	172	"	"	17	"	"
172	"	196	"	"	18	"	"
196	"	208	"	"	20	"	"

The above loopers mentioned will correspond with the gauges of the knitting machines.

NOTE.—The Gauges often used relate to the number of needles to 1½ inches, or the number of needles in 2 inches; but from their awkwardness and liability of confusion, the better plan is the number of needles to the inch.

PERFECT FAST BLACK FOR HOSIERY.

THE WORK SPEAKS FOR ITSELF.

Dubois' Sanitary Fast Black Leads Them All.

Adopted by leading mills everywhere successfully. Mills started with Dye Formula for black with lisle thread finish, also with colors and bleaching formulas if desired, taught by Mr. Dubois himself. Will contract for every piece of machinery required to start a fast black dye house with dye formula if desired.

FOR LUMP SUM IN CASH OR ON INSTALMENTS.

The black is inexpensive, non-poisonous, color always uniform, will not crock, fine shade blue black or jet black produced as desired without extra cost.

Stockings dyed in one dip, right from the Knitting machine and leaves the goods strong. Best, safest, quickest and finest black in the world.

Note—I give gratis to any purchasers of the dye formula with lisle thread finish (patents applied for) a license for my latest improved oxidizing machines (patents applied for) that does away with all belting and pulleys.

COST: No. 1—Black warranted positively ungreenable, $3.00 per 100 lbs.
" No. 2—Also ungreenable, but not so fine a finish, $2.50 per 100 lbs.
" No. 3—Almost ungreenable, an all-around black, $2.00 per 100 lbs.
" No. 4—A black equal to the best of other Dyers, 1.50 per 100 lbs.

I guarantee all the above in every particular, or no money. Address Direct

A. N. DUBOIS, Analytical Chemist and Colorist,

Inventor, Patentee,

2170 Sedgeley Avenue, Philadelphia, Pa.

NOTE—I have no agents, but sell direct only.

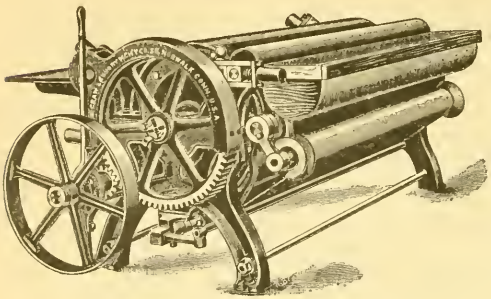
30	26 "	8¼
32	23 "	9¼
34	20 "	10½

A variation of 6 to 8 grains in 50 yards may be made on any gauge, if too firm a rib is not desired, either on the light or heavy side of the weight given.

If it is desired to run more than one thread, multiply the number of the cotton yarn (in the middle table) by the number of threads it is desired to run. For example, No. 10 cotton is run on 24 gauge, single thread. If two is desired, No. 20; if three, No. 30; and so on for as many threads as it is desired to run. This rule does not apply to numbers marked "light side" or those marked "heavy side," as the yarn would be too light or too heavy for the gauge, if multiplied more than twice.

The gauges in the above table are the number of leads in three inches. These same tables may be used for plain goods. The idea of using a heavier or lighter yarn on ribbed machines is to make the rib look finer or coarser, as the case may be. For instance, it is possible to give the appearance of 16 gauge or 20 gauge on an 18 gauge machine by using heavier on lighter yarn.

AUTOMATIC IRONING AND PRESSING MACHINE FOR KNIT GOODS.



This machine irons and presses ribbed and flat underwear, giving a fine smooth finish and most attractive appearance to the goods, not to be obtained in any other way. It does not break buttons. Inexpensive and easy to operate, and has large capacity. Knitting mills using them are greatly pleased with results. This method of finishing is sure to come into universal use. Size.	Girth.	Length.	Size.	Girth.	Length.
1	34	29	4	40	32
2	36	30	5	42	33
3	38	31	6	44	34

It will be observed that there is an increase of length of one inch to each size. This is to allow for the crawl or shrinkage of the goods when on the wearer.

Size of sleeves for Men's Shirts: 34 and 30, 18 in.; 38 and 42, 19 in.; 40 and 44, 20 in.

MEN'S DRAWERS.

Size.	Girth.	Length of Leg Outside.	Length of Inside Seam.	Length of Back.	Length of Front.	Rise of Crotch from Seam.
1	30	38	29	12½	11½	2
2	32	39	30	13½	12	2
3	34	40	31	14	12½	2¼
4	36	41	32	14½	13	2¼
5	38	41	32½	15	13½	2¼
6	40	42	33	15½	14	2¼
7	42	43	33½	15½	14½	2¼
8	44	43	33½	16	15	2¼

Size No. 44 is generally called an extra size.

Yarn wound on cones by the "UNIVERSAL" system delivers to knitting machines WITHOUT REWINDING, and with perfect uniformity.

No cobwebs on the end of cones and no waste of yarn.

The yarn is cleaned by the process of winding and knits a more uniform fabric.
